## \$470,000 Annual Budget

### Football Receipts Yield Most of DUAA Income

Copyright, 1959, The Duke Chronicle  
By STEVE HAMMER  
Chronicle Editor

Contrary to public opinion the University's varsity athletic program is not always a profit-making operation.

In fact, figures released this week by athletic director E. M. Cameron show that the Athletic Association must watch its pennies just as closely as most other departments of the University. The only difference is that it has "more pennies to watch."

According to Cameron, the Athletic Association usually has about a \$470,000 annual budget, including general operations and the scholarship program.

Football produces over 60 per cent of the income for the varsity athletic program. To break even the Association must earn at least \$30,000 from each game. For the year ending June 30, 1957, the Association lost \$50,000 because of poor gate receipts; but last year, with a \$109,222 profit from the Orange Bowl game, the Association came out almost \$100,000 ahead.

Cameron predicts that the program will run in the black this current year because of the improved gate receipts.

The other sources of income for the Association are basketball game receipts, student fees, concessions, alumni and friends, and a write-off on scholarship costs from the University to pay for its share of the maintenance expense on buildings and grounds which are not always used for varsity athletics.

Cameron emphasized that the University does not have any extensive campaign for athletic funds (such as the IPTAY Fund at Clemson).

(Continued on page 7)

## Athletic Budget

### AVERAGE INCOME

Ten football games .....	\$300,000
Student fees .....	38,000
Basketball games .....	15,000
Average total income .....	\$353,000

### AVERAGE EXPENDITURES

General expenses:	
Opponents' share of gate receipts .....	98,000
Meals for scholarship men and training tables .....	60,000
Equipment and supplies .....	30,000
Miscellaneous travel (not teams)* .....	20,000
Compensation for game personnel (not officials) .....	12,000
Capital improvements .....	10,000
Officials compensation .....	7,000
N. C. gate receipts tax .....	7,000
Hospital and medicine .....	6,000
Band expenses .....	5,000
Advertising .....	2,000
Average general expenses .....	257,000

### Minor sports expenses:

Baseball .....	9,000
Track .....	7,000
Lacrosse .....	4,500
Tennis .....	3,000
Golf .....	3,000
Swimming .....	2,000
Soccer .....	2,000
Wrestling .....	1,800
Cross-country .....	1,000
Average minor sports expenses .....	30,300
Salaries for coaches and staff and any funds available for reserve .....	65,700
Average expenditures .....	\$353,000

### SCHOLARSHIP PROGRAM (excluding meals)\*

Average income:	
Alumni and friends .....	\$ 30,000
University's write-off for Association's maintenance expense on gyms, tennis courts, landscape, etc.* .....	60,000
Concessions .....	25,000
Total average income .....	\$115,000
Average expense (100 scholarships):	
Tuition .....	60,000
Fees .....	15,000
Room rent .....	17,500
Laundry .....	13,500
Books .....	5,000
Average Expense .....	111,000
Surplus .....	4,000
TOTAL VARSITY ATHLETIC BUDGET .....	\$468,000

\*See story for explanation.

## IFC Declines To Set Curfew On Week-Night Rush Action

★ ★ ★

### West Rush To Begin; 400 Freshmen Eligible

Over 400 freshmen will be eligible to participate in fraternity rush which begins tomorrow, Barney L. Jones, dean of freshmen, said Wednesday.

The number of C-average freshmen may rise to 420 when all grades are reported, he added. A final compilation will be announced in freshman assembly Tuesday.

This number, which represents 58-60 per cent of the freshman class, is one of the largest in the history of the school, Jones said. Seven hundred and six men out of a class of 732 remain in the class of '62.

Formal rush begins tomorrow with a compulsory assembly at 1 p.m. Then from 2-5:30 freshmen will visit eight fraternities, spending 20 minutes at each. Sunday afternoon, they will visit the remaining nine.

Chow trains will be the only scheduled functions Monday and Tuesday. Arrangements for these will be made by individual fraternities.

Wednesday, compulsory open houses will again be held. The freshmen may select any four sections to visit. Sunday, February 15, open houses will be held by invitation.

Quiet period begins at 5 p.m. Sunday. Bids will be extended Tuesday and freshmen will return between 1-4:30 p.m.

### Discussion Centers Around Enforcement, Two Proposals Turned Down by Council

By WALT GILLELAND

The Interfraternity Council last night declined to include a midnight rush curfew on week nights during the nine-day rushing period.

The proposal provided that contact between freshmen and fraternity men after midnight Monday through Thursday of next week be a major rush violation. The problem of enforcement was the center of conversation during the one and one-half hour discussion.

The curfew motion was first presented with the enforcement responsibility resting with the freshman class. It was defeated, 14-5. A second motion, placing enforcement in the hands of the executive committee of IFC and the freshman housemasters was also defeated, 11-8.

The eight fraternities favoring the motion with IFC curfew enforcement were Beta Theta Pi, Delta Sigma Phi, Phi Kappa Sigma, Pi Kappa Alpha, Sigma Alpha Epsilon, Sigma Chi, Sigma Nu and Theta Chi.

The fraternities opposed were Alpha Tau Omega, Delta Tau Delta, Kappa Alpha, Kappa Sigma, Lambda Chi Alpha, Phi Delta Theta, Phi Kappa Psi, Pi Kappa Phi, Sigma Phi Epsilon, Tau Epsilon Phi and Zeta Beta Tau.

Freshman president Jim Fowler expressed the opinion that the freshman class would still stand behind the curfew proposal and refuse to be rushed after midnight on the stated days.

IFC president Chuck Yengst also announced that a committee investigating a dirty rushing charge against Alpha Tau Omega fraternity could, according to IFC vice-president Mike Steer, "make no confirmation or find any incriminating evidence against the fraternity."

Alpha Tau Omega had been charged with holding an illegal rush party just before exams last semester. Upon hearing the committee's results, Beta Theta Pi and Phi Kappa Sigma, the fraternities initiating the investigation, had requested that the charges be withdrawn.

The committee was made up of Yengst, Steer, and Brent Harrison. The investigation was begun more than a week after the alleged violation.

## Internal Revenue Chief Counsel Addresses Two Hundred N. C. Attorneys Meeting Here

The chief counsel for the Federal Internal Revenue will address 200 North Carolina attorneys meeting here this afternoon and tomorrow.

Arch M. Cantrall, the federal chief counsel is speaking before the opening session of the group, meeting here under the sponsorship of the North Carolina Bar Association and the Wake Forest, UNC, and University law schools.

"Current Problems in Federal and State Taxation" is the topic the attorneys will bat around.

The opening session is a 5:30 banquet at the Men's Graduate Center.

James B. Duke professor of law Charles B. Lowndes and University professor of law Robert Kramer will also speak at the banquet.

After the banquet the attorneys will take time out to see tonight's Carolina game. The institute will close with a panel discussion tomorrow.

The topic of the discussion will be "North Carolina Tax Procedure: How to Contest a Tax in North Carolina."

- Rushing regulations.....page 7

I'M JOE, FROM—Rush 1959 begins tonight at midnight, with the first functions scheduled for the early morning hours. Scenes like the one above from last year's Rush Week will be the rule as numberless fraternity men greet innumerable freshmen with the traditional self-introduction. A sleepless, sore-armed eight days later, glorified rushees will have the honor of becoming inglorious pledges.

Business Manager

## Stay Off the Floor

Carolina's vaunted basketball team—number two in the nation, and all that—comes to town tonight to face the fast-improving Blue Devil sophomores, but officials in the Indoor Roman Coliseum seem more worried about stopping the crowd than the Tarheels. "Red" Lewis, Eddie Cameron and other officials figure that Coach Bradley and his team can take care of the boys from Chapel Hill, but nobody knows how to keep the student body off the playing floor.

The only group that can really solve the problem is the student body itself, and that's just what we're asking it to do.

We don't object to vehement shouting, verbal attacks on players, "assisting" the referees, and the other usual forms of crowd support; but there's no reason at all for students to be on the playing floor, whether it's before, during, or after the game. The floor is for players and referees, and for them alone.

## Washing Rushing

Nearly any deferred system seems to bring on some measure of "dirty rushing," but suffice it to say that things on West have gotten out of hand this year. One fraternity, which got only nine pledges last spring and which was turned in two weeks ago, even went so far as to tell the IFC president that it was pushing the rules as much as possible just as long as it was not caught.

When fraternities get this far out of line, it's evident that either the rush system or IFC needs revamping.

We are not at this time offering a better system, but we do urge IFC, MSGA, and even the Administration, if necessary, to plan some rush program which will eliminate or at least substantially reduce "dirty rushing."

This will require a better definition of the rush rules, a better enforcement system, more IFC initiative in apprehending and prosecuting violators, and a better rush calendar—all of which have been lacking this year.

Deferred rushing can be conducted in a respectable manner, but this has not been the case on West this year. IFC should start now to improve its rush program for future years.

## FRONT ROW CENTER

### Bewitched, Bothered, Bewildered

By GARY TABOR

During the final weeks of January, Duke students were not only bewitched and bothered by their final examinations, but they were bewildered, wondering whether they should study or "take in a flick." No matter what the scholastic pressure, the theater trade boomed, but many students may now be wishing that the merit of motion pictures had not offered so many alluring selections.

While the entrées of *Auntie Mame*, *Some Came Running*, and *Bell, Book and Candle* looked most enticing, not one of the films is completely satisfying. *Auntie Mame* is more so than the others, but the successfully retransplanted story—from the Patrick Dennis book to the stage to the screen—suffers only in its too lengthy film version.

Rosalind Russell is outrageously hilarious as the loving protector and the domestic corruptor of her orphaned nephew. The bright and saucy screenplay of Betty Comden and Adolph Green follows the youth's abnormal education from the prohibition through the Depression to the present day. The spotlight is on the sybaritic educator and her clan of cronies, the most outlandishly humorous of which are Peggy Cass, as Miss Gooch, and Joanna Barnes, as Gloria Upson. Directed and bathed in opulence by Morton Da Costa, *Auntie Mame* suffers only in its excessive length, but my how I enjoyed suffering.

The impossibility of effectively translating James Jones' mammoth novel *Some Came Running* to the screen is made quite apparent by

the Sol Siegel Production of the motion picture. *Some Came Running* tells the story of a lonely, sensitive writer and his search for love and understanding. It is the story of two black sheep, whose loneliness drives them together. However, in their union, death takes one of the partners for his own.

Fine performances are given by Frank Sinatra, as the outcast author, Arthur Kennedy, as his Babbitt-like brother, and Shirley MacLaine, as the black sheepress. As the alcoholic buddy of Sinatra, Dean Martin is surprisingly superb. Despite the worthy performances, the motion picture fails. Director Vincent Minnelli cannot overcome the fact that coincidence and an unconvincing and melodramatic climax tie the story together in an artificially contrived manner. *Some Came Running* has an overabundance of rare elements, but a forced combination of these elements is destroyed by the scenario's inability to make a cohesive film adaptation from the sprawling novel.

*Bell, Book and Candle* is a mildly enchanting motion picture. The ingredients of the magic brew responsible for this enchantment are not so much the acting of James Stewart, the presence of Kim Novak, and the humor of Jack Lemmon, Ernie Kovacs, Hermoine Gingold, and Elsa Lancaster, but the contributions of art director, Cary Odell, color consultant Eliot Elisofon, and camera man James Wong Howe.

Realizing that the story of love's bewitching of an honest-to-goodness twentieth century witch is not efficacious on the screen, placed in the cauldron by itself, elements of artistically applied technology are wisely added and stirred. The resulting concoction has no permanent effects, but one can, falling under the film's spell, derive some genuine delight.

## Ivory Elephant

Editor, the Chronicle;

I think that it is safe to say, that in the past, almost all of us students, here at Duke, have questioned the soundness of the D.U.A.A. We all realize that the amounts of money spent on athletics are tremendous. However, let us not forget to consider the returns on the dollars spent in each every phase of our athletic program. The so called "White Elephant" i.e. the board track, is the result of something infinitely deeper than just another expenditure. The purchase of the track will be justified when the Spring track season arrives. The board track might enable Duke trackmen to sweep to an-

other A.C.C. championship. If so, I seriously doubt if many questions will be raised about the policy of withholding a financial statement. The "White Elephant" might turn out to be made of IVORY.

Sincerely yours,  
Robert L. Brown "62"

## Track or Pool?

Editor, the Chronicle;

Concerning your editorial of January 14, in which you referred to the new indoor track as a "white elephant," I would like to express my opinion. Your article left the general impression that, in your opinion, the money spent for the "white

elephant" indoor track should have been used for the "archaic" swimming pool. Your opinion is typical of the University student body, in that no one seems to care about track, cross-country, or the teams that participate in these sports. Cross-country was a literal "unknown" until we won the State and A.C.C. Championships, while enjoying the first undefeated season since 1935. Most of the boys on this championship team also run indoor track. Up until we obtained the "white elephant," we were forced to run in the course of the indoor stadium or travel to U.N.C. and use their track. To refresh your memory, may I add that Duke has fielded some "respectable" indoor track teams even with this handicap. I might also say that I doubt seriously if the swimming teams could have done as well without a pool.

In my opinion, the swimming pool is adequate and the wooden indoor track needed. Even if the track is not a dire necessity, I still hold that it is a just reward for the great record posted by the Duke track teams over the past year (Frosh track team undefeated all season; Varsity track team undefeated in all dual meets). You will have to admit that Duke University is known more for track than for any other minor sport.

I sincerely hope that I have removed the biased opinion concerning the much needed and deserved indoor track, that you have placed in the minds of your readers. I hope you will, in the future, procure the facts regarding a situation before you attempt to write an editorial.

Yours truly,  
David Honeycutt

(Editor's Note: Mr. Brown and Mr. Honeycutt are two aspiring candidates for the cross-country and/or the track teams.)

## Diverse Circus

Editor, the Chronicle;

Your Wednesday's editorial, "Depressing Uniformity," was not only depressing but thought provoking. Carried to its logical conclusion your article implies that from the masses who apply for admission next year the University should choose only those who do not fit the present mold of the "ideal Duke Student." In September we could expect an unattractive, poorly dressed, unenthusiastic freshman class, the members of which will all have diverse, unhealthy philosophies, and they will have philosophies.

This is not boring. More important, it is not depressingly destructive of the diversity upon which progress thrives and genius is nurtured. Freedom requires diversity; liberal education demands it. Until the University is ready to recognize this, it cannot be great.

The real source of our depression is that we will not be here next year to enjoy the diverse circus.

Georgia Farmer  
Harriet Keyes  
Winnie Stafford

## Who Is Right?

Editor, the Chronicle;

In the January 14 issue of the Chronicle I noticed an article concerning the financial aspects of the yearbook. Business manager Tom Irwin stated that the total cost of the *Chanticleer* to the student is \$4.50. Well, this is fine, but I also noticed an Eastern Campus Express bulletin board which seems to somewhat contradict this fact. The memo states in part, "The University makes a \$3.50 appropriation per

sign exclaiming the Omega

# Views On Fraternities, Independents

## By RUSS PHILLIPS Independent

Deciding whether to remain independent or to join a fraternity is, essentially, a subjective decision. There is no way by which one might objectively determine the advantages and disadvantages of both and by weighing the results arrive at a decision. Thus, when confronted with the necessity of making a decision, a thinking person finds himself in a dilemma; for he can never be certain that the choice he makes is, for him, the right one. The magnitude of the dilemma is increased by the necessarily superficial and affected rush period during which time, particularly, appearance seems to be reality.

A decision, however, is necessitated, for to join an organization without any valid reason for affiliation, is, to say the least, nonsensical and absurd. One must, therefore, try to determine for oneself the advantages and disadvantages of remaining independent.

It seems to me, after nearly four years of being independent, that any advantage of independent living which I might suggest could be considered, if someone were taking the other point of view, a disadvantage. This is the reason that I emphasize the subjectivity of the decision making.

It is pointed out that an obvious disadvantage of independent living, especially at Duke, is that one is thrown, literally, on a hall with people with whom one is not necessarily compatible. This is true, but it is a disadvantage only to a degree. The advantage of this "obvious disadvantage" is that one is free to choose one's own friends; there is no forced compatibility. To me this advantage is more positive than the disadvantage is negative. The argument that in a fraternity one learns to live with others, is a specious one; if it is true, it is equally true on a hall in a non-fraternity dormitory.

Another advantage in being independent is that one can have

as much, or as little, social activity as one wants—or what is more important, as one's time allows. The primary purpose of college is an academic one; this is a serious purpose, and it should not have to compete with an over-indulgence in social activities. For me, an unorganized social life, allowing me to do what I want when I want nearly eliminates this competition. It is important too, I believe, that my choice affects no one but me.

The greatest disadvantage in being independent is what I should call a psychological one. To numbers of people, being independent is a sign of non-acceptance (and to some, what I think is more damning, a sign of physical and/or mental oddity). It is seldom a consideration that a person remained independent of his own choice. A question repeated dozens of times over the holidays and during the summer vacation is "What fraternity did you pledge?" or "What fraternity are you in?" The answer, "I'm not" brings a shrug and an "Oh..."

Happily, this attitude is becoming anachronistic; particularly is this true in the East where academics have assumed their proper primacy on the college campus. Unhappily, the attitude is still prevalent in the South, particularly in small towns, and for that matter on this campus. What better example could I note than this paper's own column, "Duke's Mix-ture," in which everyone is properly catalogued according to his fraternity and not as an individual.

I should not, however, consider this a valid reason for affiliation.

The greatest advantage in being independent is that one does not have to participate in what, unfortunately, is a damaging period to personality and to academics. I, obviously, mean rush. I do not have to force a smile, to tell a lie, to malign a personality, to forego study for an insipid stag party or an all-night meeting. To me, to my ethics, this is important.

These four considerations were primary when I decided to remain independent.

## ★ ★ ★

The Chronicle has asked Russ Phillips, MSGA senator, and Dick Bevis, Judicial Board chairman, to advise freshmen on the advantages and disadvantages of being an independent or joining a fraternity.

Both of these seniors are respected campus leaders and their opinions may be helpful to freshmen who are wondering what things will be like four years from now.

Phillips, an independent, was vice-president of MSGA last year and is treasurer of Omicron Delta Kappa, senior men's honorary leadership fraternity.

Bevis, a fraternity member, served on Judicial Board last year, is a Red Friar, and belongs to ODK.

## By DICK BEVIS Fraternity

In a short while, approximately three hundred freshmen will commit themselves to living in the Duke fraternity system for four years. In past years, many of their predecessors have taken the same action in ignorance of consequences, good or bad. It is time we took an objective look at our fraternity life here, for the enlightenment of its potential members.

We must avoid the fallacy into which many people at Duke and elsewhere fall, of thinking that fraternity membership is inherently "good" and fruitful.

While independent status is "bad," tedious and indicative of a social failure. Due mainly to policies of the University, the Duke fraternity system has some special features which make it a thing apart from the national fraternity system in general. These features include no fraternity houses, tight Administration rules covering parties, open houses, etc., little alumni interest and financial support in comparison with many schools, and a type of rushing almost unique in its cut-throat quality. On account of these peculiarities, my observations are not applicable to the

national fraternity system, but are directed only at fraternities on our campus.

## PROS

On the positive side, four main advantages of fraternity life may be listed:

1) First, and probably most important in a large school, is that the fraternity is a conveniently small social unit within the University. It is a great aid to organized social life in what otherwise tends to be a scattered and heterogeneous mass of students. Its function as a social organizer in a large society is probably the chief reason that fraternities exist. If you prefer to look out for your own social life, or don't like big parties, this point is lost on you. Also, it has been contended that other small groups than social fraternities can serve this function.

2) Fraternities teach you—in fact, almost force you—to live with and get along with other students. Since most fraternities contain a great diversity of personalities and interests, and the fraternity man must live and work with them, this is a legitimate advantage.

3) A fraternity is a group whose members share a common purpose: the preservation and betterment of the group. In a large University, where the students seem headed in so many different directions, this sense of group purpose is often welcomed

by those who do not get it elsewhere.

4) The brothers of every fraternity take oaths that they will follow high standards of scholarship and character. This is an excellent ideal, but, unfortunately, it seems generally to have proved too idealistic for the modern fraternity, those at Duke included.

## CONS

We can list six chief disadvantages to Duke fraternity life:

1) The host of activities of Duke fraternities—rush, chapter meetings, parties and dances, intramurals, semi-compulsory card games, etc.,—drain valuable time from the average student's schedule. As a result, grades generally suffer from a lack of study time.

2) The lack of time also keeps many students from being able to participate in more creative and worthwhile extra-curriculars.

3) Fraternities are expensive. They are a sizeable and constant financial burden.

4) Fraternities are accused of being undemocratic in the matter of rush. This is a rather dubious charge, since some selectivity must be exercised. However, it cannot be denied that fraternities do hurt feelings and make enemies for the brothers.

5) Rush engenders enmities among many fraternity men who were formerly close friends. This is particularly true at Duke.

6) Pledging a fraternity is a degrading experience. It often appears to be at variance with the fraternity's professed high ideals of friendship. At Duke, it is liable to consist of "rat courts," doing menial jobs for the brothers, getting paddled, a week-end pledge trip, and foolish stunts. Pledging also takes a lot of time; most freshmen have lost five to ten quality points during their pledge semester below first semester.

You would be wise to consider these ten points carefully before making your decision.

## DUKE'S MIXTURE

### West Rush Sets Pace For Second Semester

By BETTY CALDWELL

Cha—Cha—Cha—the wheels of second semester begin rolling as West Campus anxiously anticipates the rush turmoil.

This Saturday most of "it" begins. The Pi Kappa Phi are having a party at the Westwood Country Club, and the KAs will roll out the red carpet at Hartman's cabin.

The Betas will whip over to the School House tomorrow night for a little dancing to the tunes of Duke Snyder's Combo. Sunday, they will serve a buffet in the section.

—The Betas will be there!

The Phi Delts Playboys will "play" tomorrow night at the American Legion Lodge with a (you guessed it) Playboy Party, and in true Phi Delt tradition the Hot Nuts will make the music. A Playmate will be chosen and the boys receive "Good Groomin' Kisses."

Phi Kappa Sigma is dancing to the Hillside Joymakers at the American Legion Hut, and the Delts will follow the same entertainment route to Maulsby's cabin.

An all day affair is taking place tomorrow at Smith's lake as the ATOs climax the fun with a combo party featuring the Globes.

The Delta Sigs troop to O'Brian's cabin tomorrow night and will throw a section party Sunday evening.

This afternoon the SAEs had a "kick off" blast at Das Gasthaus to gain strength and spirits for the coming week.

Lambda Chi Alphas entertained today in their section with an open house for the girls helping them in rush.

The TEPs are gathering tomorrow night at Mayor Evan's house (no less)—veddy impressive. The Kappa Sigs are going to the woods for a combo affair. The Police Cabin will house the Phi Psis tomorrow night.

Those who came together during the break are Ann McNamara pinned to Beta Hugh Patterson; Ruth Metts to Phi Kap Winter Wright; Vivian Leamer to Pi Kap Dick Beris; Phi Kap Tim Goodman to Pat Cluweris of the University of Richmond; Carol Cleave to Jim McEthaney, a Phi Psi; Jean Ross to KA Houston Groome; Ellen Dinerman to a boy from State; Phi Kap Jim Parham to Brenda La Grange, a transfer from William and Mary; and Ardis Baker and Phi Kap Bill Johnson.

Engaged are Maggie Hicks and Jerry Alexander, Duke grads; Sarah Hagler to Dick Risely; Patsy Harill to Pete Olejar; Kappa Sig Bill Harrison to Judy Berkley from Sweet Briar and Fayl Mathis is celebrating a four month old engagement to Shirley Little from Florida. Lewis Stucky and Mary Mosteller were married.

With sadness we bid a fond adieu to Steve Crithfield, the most loyal patron of the East Campus Library, and, in token thereof, the library was dedicated to him in a solemn ceremony last week.

CRITHFIELD MEMORIAL

## CELANESE INTERVIEWING ON CAMPUS

February 10

For dates  
and arrangements,  
see your  
Placement  
Director

Where chemistry means business  
...there's more room to grow

In the past few years Celanese' wide ranging operations in chemicals and plastics, as well as in chemical fibers, have broadened into new areas, and this forward looking, diversified company foresees an even greater range of products, markets, and interests coming tomorrow from today's scientific research and development, engineering and production skills.

You needn't be "slotted" at Celanese. There's plenty of room for you to grow—not only room and opportunity, but encouragement to grow. For only with individual growth will this vigorous young company be able to meet its great, diverse tasks of tomorrow.

Wherever your technical interests lie—in chemicals, plastics, or textiles—there are opportunities for chemists, physicists, and engineers of all kinds—in research and development, in manufacturing, in technical service, in marketing.

The figures above, tabulated in Dean Robert B. Cox's office, represent the numerical scholastic rank of the 19 West Campus fraternities during the ten-year period prior to 1958-59.

For each academic year, fraternities are numbered in order of highest scholastic averages. The italicized numbers indicate the position of the all-men's average for the University. Fraternities with

higher numbers than the italicized figure fell below the all-men's average for that period.

## EARN YOUR MASTER'S DEGREE AND PREPARE FOR AN EXECUTIVE CAREER IN RETAILING

Comprehensive nine-month program for college graduates; emphasis on executive direction in major stores dovetailed with classroom work. Total pay for store work \$500. Co-ed. Scholarships. Selective job placement before graduation. G. I. approved. Next class, August 31, 1959. Apply now. Write for Bulletin, C.

## Talks Bring Change

## Powell Opens East Library on Sunday Nights

The Woman's College Library will remain open on Sunday evenings this semester instead of on Saturday evenings.

The change came as a result of several discussions between students, library officials, and the Administration which sought to make the library available at more convenient hours.

Students, especially on East, complained that it would be much better to open the Woman's College Library on Sunday

evenings when coeds are preparing for Monday classes rather than on Saturday nights when they are occupied with other activities.

Librarian Ben Powell agreed to make the changes.

The new hours are now:  
Woman's College Library  
Saturdays 8 a.m. to 5 p.m.  
Sundays 2 p.m. to 10 p.m.  
General Library (West Campus)  
Saturdays 8 a.m. to 11 p.m.  
Sundays 2 p.m. to 6 p.m.

## Episcopal Student Center Construction Begins Following \$62,259 Bid Acceptance

Major advancement towards the construction of the Episcopal Student Center has been made with the accepting of low bids totalling \$62,259.

Construction on the building, to be located on Alexander Street, will begin immediately, and the 600 Episcopal students on campus should occupy the center by next May, according to Reverend Joseph W. O'Brien, Episcopal chaplain.

The one-story, red brick building will be constructed on land leased from the University for 50 years and will have a general purpose room, chapel, library, kitchen, lounge, office, basement, and toilet facilities.

The Center will be used for worship services, student meetings, recitals, and recreation.

Funds for the building were contributed by the Episcopal Di-

ocese of North Carolina, parents of Episcopal students here, the Woman's National Auxiliary of the Church, and friends.

## ... As an RCA Engineer

Receive your MS in Electrical Engineering, Mechanical Engineering or Physics at RCA's expense, through the RCA Graduate Study Program. At the same time, you're beginning your RCA career as an engineer on a fully professional level, getting a head start in the field you prefer. RCA pays the full cost of your tuition, fees and approved texts while you take graduate study part time at the University of Pennsylvania or Rutgers University.

Or, you may prefer a different path ahead... RCA Design and Development Specialized Training. Here is another of RCA's programs for careers, in which you begin by working full-time on planned technical assign-

ments. Experienced engineers and interested management guide your progress. You may receive assignments in design and development of radar, airborne electronics, computers, missile electronics, television, radio and other equipment fields, as well as in Electron Tubes, Semiconductors and Components. MS, PhD Candidates are eligible for direct assignments in the above mentioned fields.

There's a lot more that's extremely interesting about an RCA engineering career. You should have these facts to make a wise decision about your future. Get them in person very soon when an RCA engineering management representative arrives on campus—Feb. 11.

Right now, though, see your placement officer. Get squared away on a specific time for your interview. And get your copies of the brochures that also help to fill you in on the RCA picture. If you're tied up when RCA's representative is here, send a resume to:

Mr. Robert Haklisch, Manager  
College Relations, Dept. CR-11  
Radio Corporation of America  
Camden 2, New Jersey

Tomorrow is here today  
at RCA

**RADIO CORPORATION of AMERICA**

## Do You Think for Yourself? (ANSWER THESE QUESTIONS AND YOU'LL FIND OUT!\*)

1. If you get stuck on a crossword puzzle, do you (A) finally refer to a dictionary, or (B) leave the puzzle unfinished?

A ☐ B ☐

2. Would you rather be (A) the designer of the first successful space vehicle to the moon, or (B) the first man to ride in it?

A ☐ B ☐

3. If you were faced with two tasks, one pleasant and the other unpleasant, would you first do (A) the unpleasant task, or (B) the pleasant task?

A ☐ B ☐

4. If you find you aren't doing well in an activity, do you (A) concentrate on it to improve your performance, or (B) devote your attention to things in which you do excel?

A ☐ B ☐

5. Would you prefer to play tennis with an opponent you know to be (A) not quite so good as you, or (B) a slightly better player?

A ☐ B ☐

6. In deciding whether to see a movie, are you more influenced by (A) what a casual friend tells you about it, or (B) what you know of the cast and story?

A ☐ B ☐

7. If you were a multimillionaire, would you rather have (A) everyone know it, or (B) only a very few know it?

A ☐ B ☐

8. Do you take more notice of someone's (A) good looks, or (B) good manners?

A ☐ B ☐

9. When making your choice of a filter cigarette, do you (A) act on the basis of what someone tells you, or (B) think it through for yourself?

A ☐ B ☐

If you're the kind of person who *thinks for yourself* . . . you use judgment in your choice of cigarettes, as in everything else. Men and women who think for themselves usually smoke VICEROY. Their reason? Best in the world. They know that only VICEROY has a thinking man's filter and a smoking man's taste.

\*If you checked (A) on three out of the first four questions, and (B) on four out of the last five . . . you really think for yourself!

## Football Receipts Provide Most of Athletic Budget

(Continued from page 1)

It is also significant that student fees here are the lowest for any major college in the nation. Each undergraduate pays ten dollars towards the athletic program, while graduate students are given a choice of paying or not.

At Carolina all students, undergraduate and graduate, pay a \$40 fee.

To allow for years when the athletic program goes in the red and to provide for some capital expenditures, the Association maintains a reserve totalling approximately \$300,000. This reserve includes \$100,000 in stocks and bonds, and \$200,000 in such non-earning assets as accounts receivable and inventory.

Explaining further the use of any surplus and the reserve fund, Cameron said that these are often used to pay off the debts on buildings. He said that by 1942 the Association had amortized a \$250,000 debt on the outdoor stadium. It has also paid off \$500,000 on the Indoor Stadium and recently paid off \$50,000 of the debt on the golf course.

### NO SCHOLARSHIPS FOR MINOR SPORTS

Cameron explained that the University's scholarship policy is to provide full scholarships for only football and basketball players. Partial scholarships are given in baseball and occasionally in track, but otherwise all minor sports rely on the student body for players.

"We want the nation's best college tennis or other minor sport player," Cameron said, "but only if he comes here on account of the fine academic program, not for a scholarship."

The scholarship expenses are listed separately from the general budget in the accompanying chart because the Association does not actually handle the money for scholarships, except for meals and a few other expenses.

Cameron said that the maximum number of scholarships given is 100, but for competitive reasons he would not say how these 100 are distributed or what the present number is.

It is a University policy not to release salary figures, and Cameron, for this reason, did not want to go into detail on coaches' salaries. He explained that many of the coaches also teach physical education courses, and this portion of their salary is paid by the University.

### DUA is a PART of UNIVERSITY

Despite rumors to the contrary and the impression given by the title "Association," the Athletic Association "is a segmental part of the whole University." Vice-president Charles Jordan, who is chairman of the Athletic Committee, says that the Association acts just like any other University department such as romance languages, economics, etc.

The figures in the accompanying chart are for an "average" year. Cameron did not want, in this initial report, to give only last year's figures when football receipts totaled an abnormal \$571,000, due to the Orange Bowl.

Team travel expenses are not shown on the chart because these are subtracted from the gate receipts of each game. Only the profit of the football games is shown.

CAMERON

## Rush Rules Limit Fraternity Expenditures, Explain Formal Rush Violations, Penalties

The following regulations governing this year's formal rush have been passed by IFC, and any infraction of them by fraternities is considered a major violation.

A fraternity may not spend more than \$250 for rushing, and no expenditures can be made for entertainment of freshmen off campus. All expenditures must be approved by the IFC vice-president and paid out of the fraternity treasury.

No alcoholic beverage may be drunk on campus by freshmen with fraternity men. Housemasters and assistant housemasters

may not attend rush functions. Fraternity men are not allowed in freshmen dorms or Kilgo quad during formal rush.

FAC men and other fraternity men previously granted permission to enter freshmen dorms will have this permission suspended during rush unless granted by the IFC vice-president.

All fraternity men and freshmen are obliged to abide by these rules and to report any violation. Violations must be reported in writing within 60 hours after the infraction and must be attested by two witnesses or signed by an officer of the IFC.

## Duke Ranks Among Top 19 College Choices In Merit Scholarship Preferential Listing

Now even the public admits it—Duke is hot stuff.

In a preferential listing of colleges by the National Merit Scholarship winners and finalists, Duke was rated as one of the nineteen choices by both men and women.

Not only that but the University was one of only six to be favored by both sexes.

The *Chicago Tribune*, which published the list, said that factors influencing the high school students included academic standing, high-ranking departments in fields of special interest to the students, recommendations of friends, desirable loca-

tions and parents' opinions.

The top colleges (alphabetically) according to the men scholars are: California, Cal Tech, Chicago, Columbia, Cornell, Dartmouth, Duke, Georgia Tech, Harvard, Iowa State, MIT, Michigan, Notre Dame, Princeton, Purdue, Rice, Stanford, Wisconsin, and Yale.

The women rated these colleges as tops: Barnard, Bryn Mawr, Carleton, Chicago, Colorado, Cornell, Duke, Grinnell, Indiana, Michigan, Mount Holyoke, Oberlin, Radcliffe, Smith, Stanford, Swarthmore, Washington, Wellesley, and Wisconsin.

## 'Fortune' Magazine Publishes Excerpt From Latest Book by Arthur Larson

This month's issue of *Fortune* magazine contains an article, "The Contagion of Freedom," by Arthur Larson, director of the World Rule of Law Center.

The article is an excerpt from Larson's latest book, *What We Are For*, which will be published February 9 by Harper & Brothers of New York.

Larson contends in the article that American techniques for achieving economic progress have recently been copied by West Germany, Japan, Italy, and Communist Russia. He also asserts that the Soviet Union's greatest accomplishments have come in the areas in which they have applied American principles

instead of Communist teachings.

As viewed by Larson, former director of the U. S. Information Agency, the "American way" of doing things is much more successful than the Communist way and is therefore imitated.

The term of office of a Trustee of the University is six years.

## Snyder's Combo Plays At Candlelight Cabaret

Student Union's Social Committee will sponsor its third Candlelight Cabaret tonight in the Union Ballroom.

Dancers will step to the music of Duke Snyder's Combo. Activity will begin immediately after the Carolina game, and admission is free.

Another Cabaret is scheduled for February 20 following the Virginia game here.

## JOB OPPORTUNITIES!

A General Motors representative will be on campus  
February 11, 12 and 13.

Contact your college placement office to arrange an interview.

*At General Motors  
there's room  
to stretch your  
imagination!*

A single control starts, stops, and steers the Firebird III—or this GM "laboratory on wheels" can be safely guided by electronic impulses sent from a cable buried under the road!

Fabulous steps into the future, such as this, can be made only by men with fabulous imaginations. A lot of such men work for General Motors and its divisions. There's room for a lot more—maybe you.

In addition to research in the automotive and appliance fields, General Motors and its divisions are concerned with solar energy, astronautics, astrodynamics, electronics, and many fields of space engineering. If these areas of scientific study challenge your imagination, perhaps GM has a place for you at one of its plants in 71 cities.

Here is a real opportunity to put your imagination to work on everything from tiny transistors to dynamic diesels.

GM positions now available in these fields: Or men holding Bachelors', Masters' and Doctors' degrees: Mechanical Engineering • Electrical Engineering • Industrial Engineering • Metallurgical Engineering • Chemical Engineering • Aeronautical Engineering • Ceramic Engineering • Mathematics • Industrial Design • Physics • Chemistry • Engineering Mechanics.

## Atomic Energy Commission Contracts \$600,000 for Nuclear Research Here

The U. S. Atomic Energy Commission has signed a \$155,566 contract with the University that brings to some \$600,000 the total it has allotted the school for nuclear research.

Dr. H. W. Newson, principal investigator for the research and professor of physics, explained that the work involves the study of nuclear reactions and the probability of their occurrence.

Newson and Dr. Walter M. Nielsen are serving as joint administrators of the project. Assisting with the research are associate professors H. W. Lewis,

R. M. Williamson, Otto Meier, Sr., Duncan K. K. Seth, and E. G. Bilpuch.

In addition to the \$600,000 which the Commission has made available during the past six years, the agency also purchased the University's \$450,000 Van de Graaf accelerator.

Newson was one of the first asked to participate in the Atomic Energy Commission when it was consolidated in 1941. He has served in the Oak Ridge National Laboratories; at Los Alamos and at Hanford Engineering Works in Richland, Wash.

## Loyalty Fund Collects \$194,778 at Mid-Year To Surpass 1958 Halfway Mark By \$5,000

At the halfway point, the University's Loyalty Fund contributions have reached \$194,778.73 of the \$300,000 goal.

In its mid-year report last week the Fund's officials also announced that so far 5,272 people have made donations.

The campaign is ahead both in amount and in number of donations, compared to last

last year's drive at the halfway mark. Last year at this time 5,188 donors had contributed \$189,677.88.

The money raised to date has come mainly through drives by class and school agents, committees of parents, and Durham non-alumni. Campaigns in areas will begin on February 12. The drive ends on June 30.

DUKE UNIVERSITY DINING HALLS

WILLIAM F. BLOOMFIELD, B.S.I.E., LEHIGH, '53, SAYS:

## "Join me for a day at work?"

Bill is Plant Service Supervisor for New Jersey Bell Telephone Company at Dover. He joined the telephone company after graduation, has held many jobs to gain valuable experience. Now he has three foremen and 32 craft people working for him. "It's a challenging job and keeps me hopping," says Bill. "See for yourself."

"8:30 a.m. With my test bureau foreman, I plan work schedules for the coming week. Maintaining equitable schedules and being ready for emergencies is imperative for good morale and service."

"9:10 a.m. The State Police at Andover have reported trouble with a mobile radio telephone. I discuss it with the test deskman. Naturally, we send a repairman out pronto to take care of it."

"11:00 a.m. As soon as things are lined up at the office, I drive out to check on the mobile radio repair job. The repairman has found the trouble - and together we run a test on the equipment."

"1:30 p.m. After lunch, I look in on a PBX and room-phone installation at an out-of-town motel. The installation supervisor, foreman and I discuss plans for running cable in from the highway."

"2:45 p.m. Next, I drive over to the central office at Denville, which is cutting over 7000 local telephones to dial service tomorrow night. I go over final arrangements with the supervisor."

"4:00 p.m. When I get back to my office, I find there are several phone messages to answer. As soon as I get them out of the way, I'll check over tomorrow's work schedule - then call it a day."

"Well, that's my job. You can see there's nothing monotonous about it. I'm responsible for keeping 50,000 subscriber lines over a 260-square-mile area in A-1 operating order. It's a big responsibility—but I love it."

Bill Bloomfield is moving ahead, like many young engineers in supervisory positions in the Bell Telephone Companies. There may be opportunities for you, too. Talk with the Bell interviewer when he visits your campus and get the whole story.

# Tarheels Seek Revenge Over Big Blue

## The Sports Scene

### Duke's New Look

By ART SANTO DOMINGO  
Chronicle Sports Editor

By ART SANTO DOMINGO  
Chronicle Sports Editor

The Blue Devils who take on Carolina tonight in their toughest game of the season are not the same team which was so listless and colorless at the first part of the season.

The youthful Dukes got their initial taste of ACC play before the exam break, and during the preceding two weeks split six games while "traveling around like pros" as Johnny Frye put it. A tired group of hoopsters went into and came out of final exams with no casualties reported. But now well rested and on the wings of a three-game win streak, the Devils are ready for the nation's number two team.

#### MORE AGGRESSIVE PLAY

Bradley has attributed the recent play which produced wins over Maryland, Pitt, and South Carolina to aggressiveness, "a lot of movement on defense, and hustle." The latest success, 80-72 over USC, saw Duke hit 46.6 percent from the floor and amass its highest point total of the year.

Part of the success and much of the new spirit is due to the presence of Jack Boyd, the outspoken guard with the fastest hands and reflexes on the squad. His running chatter has livened up previously quiet practice sessions, and he has needed the shy sophomores to greater heights.

Bradley credited him with sparking the team to victory in Columbia Tuesday night by steadying the sophs down before they blew the entire lead they had built up on tre-

BOYD YOUNGKIN FRYE SMITH

mendous shooting. Boyd is proud of his seven rebounds, and the 5-11 speedster threw in eight points to boot.

Boyd's character is symbolized by his speed. He has a flash about him that makes you like him, and a certain confidence which allows him to shrug off mistakes. Thus far he has been a bit off in his shooting, but his quick hands have led to easy baskets on the thread-the-needle type passes to the big men under the boards.

The return of the Yeadon, Pa., native with his own special mannerisms and indomitable spirit has perked up the whole team. Boyd is not only a good ballplayer, but he has those hidden assets that are part of a player like Billy Martin, the volatile ex-Yankee who wants only to win.

#### YOUNGKIN BENEFITS MOST

One of the men who has benefitted most from Jake's return is Carroll Youngkin, the 6-6 center. The Big Y has scored at a 21.6 clip in the past five games, and outdueled Pitt's All-American ace, Don Hennon, last Saturday, pouring in 35 to Hennon's 31. His rebounding has also improved. His chief board partner, Doug Kistler, has also been more aggressive recently and the duo is now fighting like mad for those rebounds.

Johnny Frye knows he was in a rough game at USC. The speedy sophomore had his dental plate knocked out in a scramble, and now looks a bit like Larry Bateman, better known as Nipper to his mates. Frye's ivories are back in place now.

We'd like to give a pat on the back and call attention to another soph who is making a name for himself as a member of the swimming team. Steve Smith, a sensational sprinter from Cleveland, is unbeaten in nine trips to the tank for Coach Jack Persons' Devilfish.

## 'They'll Be Tough,' Says McGuire

By JOE BOWLES  
Assistant Sports Editor

Duke's basketball teams will have their hands full tonight when they face the revenge-minded aggregations from the University of North Carolina. Last year the Blue Devils, led by the fabulous "Flaming Five," toppled the high-flying Tarheels twice, while the Blue Imps amassed a 4-0 record against the UNC frosh. Despite their impressive record (13-1), the second-ranked Tarheels are not taking tonight's game lightly. "We know that Duke has developed into a very strong club and will not be a pushover for anybody," declared Carolina coach Frank McGuire on his regular Sunday evening TV show last week. "They did a truly outstanding recruiting job two years ago and that wonderful freshman club of last year has now led into a group of veterans. They will be tough."

The men of coaches Hal Bradley and Whit Cobb will have their work cut out for them as all starters for the Tar Heels and the Tar Babies are scoring in the double figures.

The men from Chapel Hill are led by a couple of sharp-shooting sophomores in guard York Larese and forward Doug Moe. Larese is the team's leading scorer, possessing a 15.4 average. Moe, called potentially the best player in the ACC ever by coach Everett Case of N. C. State, has been the star for the Tar Heels in their games since the examination break, and holds a 12.5 average.

The big men for the Tar Heels are juniors Dick Kepley (10.7) and Lee Shaffer, the second-high scorer at 13.3 points per game. Kepley is the leading rebounder with 108, while Moe has garnered 100 and Shaffer has collected 90 in the 13 games played through Tuesday.

Harvey Salz, the other guard on the sting five is averaging 11.9 points a contest, while being the floor general for McGuire's cagers. The sixth man on the squad, captain Danny Lotz, is expected to see plenty of action as the Tar Heels replace. Others sure to see action are jumping-jack Ray Stanley and Hugh Donohue.

The Tar Babies, in the 6:20 prelim, carding a 5-2 record, have looked very impressive, losing only to the frosh of N. C. State and Wake Forest. They are led by center Jim Hudock (15.6), forwards Ken McComb (10.7) and Bill Hubbard (10.0), and guards Don Walsh, the leading scorer at 17.3 and Yogi Poet (12.7).

Thought and Action

## The Duke Chronicle

SPORTS EDITOR: Art Santo-Domingo

## Swimmers, Malmen See Action Saturday

Duke's swimming and wrestling teams resume activity this semester tomorrow afternoon as they take to the road for encounters with Wake Forest and Washington and Lee respectively.

For coach Jack Persons' Devilfish it will be the third out of town meet in succession. The swimmers had a three-meet win streak going as they traveled to Army and Navy this week.

Before these matches, the Devilfish had a 4-1 record for the campaign. After tomorrow's action in Winston-Salem, the splashers rest until next Saturday when they entertain Washington and Lee in the Duke tank.

Coach Carmen Falcone's wrestlers will be making their third appearance of the season against Washington and Lee in Lexington, Va., tomorrow. The grapplers have split two previous trials, losing to UVA and whipping State.

The match will be the final road task for Duke, and the next three matches, starting with Carolina next Saturday will be contested in the Indoor Stadium.

## Playoff Tickets

Some 3,000 tickets are available for the NCAA Eastern Regional Basketball Playoffs in Charlotte on the 13th and 14th of March. One set of tickets may be purchased through the mail for \$5.00 which includes one admission for each night.

Checks should be made payable to NCAA TICKETS, P. O. BOX 1956, CHARLOTTE, N. C. A stamped, addressed envelope and \$3.35 for mailing charges must be included.

All University telephones whose next to last numeral is 6 are restricted to inter-University calls and cannot be used for calling into Durham or elsewhere.

## WANT TO BE WELL-ROUNDED?

The engineer who's at home in several specialties is a man in demand. At Vought, variety gives him that high polish... keeps him hip in many fields while he advances in one. Let our representative show you how Vought's cross-training and multiple products produce well-rounded candidates for top-level positions.
